IMPLEMENTATION ROADMAP — Both Landing Pages

R1. Recommended Build Sequence

Phase	Duration	Deliverables
Phase 0	Days 1–3	Set up Next.js 14 project. Configure Tailwind CSS with AIHP brand theme (custom colors, typography). Set up Vercel project + GitHub CI/CD pipeline. Create shared component library: Hero, Form, TrustBar, PropertyCard, Testimonial, FeatureTile, Footer. Implement Google Tag Manager container (single container for both pages).
Phase 1	Days 4–8	Build Sector 32 landing page (full implementation using this PRD). 2-step form with React Hook Form. CRM API integration. Conversion tracking setup in GTM (form submit, click-to-call events). All 10 page sections implemented and populated with copy from this PRD.
Phase 2	Days 9–12	Build Golf Course Extension Road landing page (clone + update content from Sector 32). Location-specific copy, property cards, map embed. Separate conversion actions in Google Ads for GCE Road. Deploy to golf-course-ext.aihp.in on Vercel.
Phase 3	Days 13–14	QA on Chrome, Safari, Firefox (desktop + mobile). Run Lighthouse CI — both pages must pass ≥ 95 mobile. UTM tracking verification: all Google Ads URLs land on correct page with correct params. Soft launch: enable in Google Ads. Monitor first 48 hours closely. Update Google Ads campaign — switch from old SEO pages to new landing page URLs.

R2. Priority Checklist Before Going Live

This checklist must be completed before switching Google Ads traffic from the old SEO pages to the new landing pages.

#	Task	Priority

1	Form submits and lead appears in CRM / HubSpot within 30 seconds of submission	**CRITICAL**
2	Google Ads conversion tag fires correctly on Step 2 submit (verified in Tag Assistant)	**CRITICAL**
3	PageSpeed mobile score ≥ 95 for both pages	**CRITICAL**
4	H1 contains exact target keyword (Ad Relevance = Quality Score)	**CRITICAL**
5	No navigation links or external links that take user off page	**CRITICAL**
6	Click-to-call button works on mobile (dials correct number)	**HIGH**
7	WhatsApp widget loads async (does not affect LCP)	**HIGH**
8	OG image and meta tags correct (verify with opengraph.xyz)	MEDIUM
9	Google Map embed is lazy-loaded and does not block LCP	MEDIUM
10	UTM parameters pass through correctly from Google Ads to CRM (utm_source, utm_campaign, utm_content)	**HIGH**
